

Synthesis papers of the

**Opening Symposium of the European Regional Centre for Ecohydrology
under the auspices of UNESCO, May 31st 2006 Łódź, Poland**

and

**European Regional Workshop of the InterAcademy Panel Water Programme
“Coupling Surface and Groundwater Research: a New Step Forward Towards Water
Management”, Łódź, September 28–29th 2006**

Contents

1. Ecohydrology in the face of the Anthropocene <i>Maciej Zalewski</i>	99-100
2. Ecohydrology, key-concept for large river restoration. <i>Fritz Schiemer, Thomas Hein, Walter Reckendorfer</i>	101-111
3. The World Lake Vision and ecohydrology: case study from Wisconsin, USA <i>Jeffrey A. Thornton, Thomas M. Slawski, Sara W. Teske, Walter Rast, Michael R. Cascio</i>	113-124
4. Global freshwater resources for sustainable development <i>Zbigniew W. Kundzewicz</i>	125-134
5. Wetlands and waters on European eastern border: is it the opportunity for ecohydrology application in Transborder Biosphere Reserves? <i>Alicja Breymeyer</i>	135-146
6. An overview of the world’s water resources problems in 2050. <i>Ghislain de Marsily</i>	147-155
7. The subsurface water system role for surface and coastal water pollution <i>Georgia Destouni</i>	157-164
8. Single scale flood risk of small basins in Slovakia. <i>Eubomír Solín</i>	165-177
The “Water” project, and the Rotary International’s approach to the solution of the water availability for all human beings. <i>Cristiano Pinzauti</i>	179-181
